CASHIER DRAWER UNITS WITH TIME LOCK AND TIME DELAY

The CoMETA electronic Cash Drawer Units is the result of extensive research into customer and market requirements.

This has produced a technologically advanced product that is practical, reliable and safely designed. CoMETA's Cash Drawer Units are microprocessor controlled and are totally programmable by the customer making the equipment extremely flexible and easy to use. The ergonomic design is manufactured from steel, and provides a streamlined and aesthetically pleasing unit. The Cashier Drawer Unit may be specified with two or three interlocked drawers that can be opened after a time-delay. The first drawer features a cash chute that may be used to transfer excess cash.

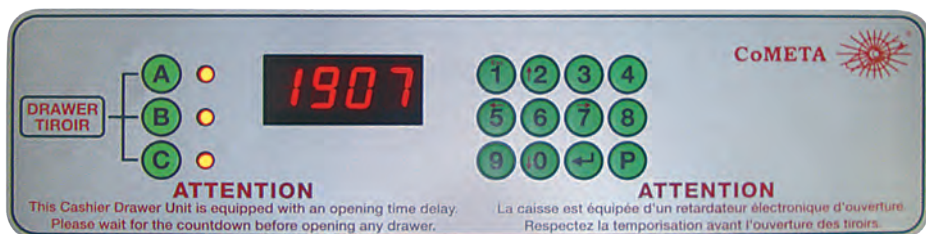

Functional characteristics
